Mission

“To be a global community that attracts and develops the right talent committed to providing excellent products and services”

What We Do Best

Financial Accounting Services

Our accounting teams, specialized in various industries, possess the necessary skills and industry-specific knowledge to deliver accurate and timely financial reports.

Corporate Finance Support Services

Our finance experts offer a range of services to assist companies in making high-stake and high-impact decisions, from budgeting and forecasting to mergers & acquisitions. We also provide support in financial modeling, valuations, data analytics and visualization, and preparing impactful presentations for investors and management. We have extensive experience supporting companies at all stages of their life cycle..

Tax Compliance and Advisory Services

Our team of tax specialists offers support and guidance throughout the entire tax cycle.

Professional Firms Support Services

Given the growing demand for skilled accounting and finance professionals, our service support model helps manage fluctuations in resources. We act as an extension of your team, enabling you to serve your clients better and more efficiently.

- Transaction Advisory Services Firm Support
- Technical Accounting Services
- Risk Advisory Services
- External Audit Services

Our Core Values

Integrity

A commitment to having the courage to stand up for what is right and ethical even when no one is looking, saying “no” when appropriate, exercising honesty at all times, owning up to the truth, and doing the right thing simply because it is right.

Excellence

A commitment to the highest standards of quality, adhering to the belief that a dream does not become a reality without determination, persistence and plain hard work.

Empathy

A commitment to exercise compassion, camaraderie, teamwork, and promote welfare of the people, client, community, environment, and the common good.

Openness

A commitment to share information and knowledge for the advancement of our cause, to not be afraid to have difficult conversation when needed to talk and describe situations with representational faithfulness.

Financial Accounting Services

Scrubbed provides a seamless way to handle accounting and financial reporting needs. Our range of turnkey solutions utilize familiar, cloud-based software to cost-effectively meet the demands of our clients. Years of Experience

The Scrubbed Difference

In the accounting world, “scrubbed” is a term used to describe books and financial records that are easy-to-follow, well-organized, professional, and accurate. *Scrubbed* books and financial records are what every accountant strives to achieve, and what we always aim to deliver.

Core Business Focus

We can alleviate your accounting and finance-related workload, allowing your management team to focus on other crucial aspects of your business.

Enhanced Service Quality

We have established policies, procedures, and processes to ensure the security and quality of our deliverables.

Access To Intellectual Capital

We have ready access to talented and experienced professionals that fit our client’s requirements.

Solve Capacity Issues

We can help alleviate capacity constraints, reducing our clients’ overhead and space requirements.

Technology-Driven

We carefully select cloud-based software that aligns with our model and efficiently streamlines our and our clients’ processes.

Cost-Effectiveness

Our outsourced professional services model significantly reduces the costs of accounting and financial functions, while still delivering client service on par with that of the Big Four.

Security Assurance

Scrubbed has successfully achieved Service Organization Control (SOC) 2 Type II Certification, following an independent auditor's thorough examination of our processes and procedures against the Trust Services Criteria for Security and Confidentiality. This certification reflects our unwavering commitment to maintaining the highest standards of excellence.

Physical and IT Security

The Scrubbed Tech Center has a 24/7 surveillance system to guarantee the safety of the premises and work environment. The building entrances are secured with biometric systems, and backup power sources are in place to avoid interruptions.

Our state-of-the-art network infrastructure provides robust security for our network, applications, and data. Laptops provided to our professionals are encrypted for data privacy and regularly updated. Endpoint security software is installed on the laptops to detect and prevent virus transmissions and data transfer.

All Scrubbed professionals are required to use VPN when working remotely, and multi-factor authentication is implemented for enhanced security. We only utilize trusted third-party web-based applications for client projects and services.

Our Cybersecurity Team regularly performs phishing simulations and security awareness training for all professionals to maintain the highest level of security.

Business Continuity

Scrubbed ensures that our clients receive top priority and that their needs are met while also taking care of our own people.

In the event of service disruptions caused by external factors such as natural disasters or man-made incidents, we will implement our Business Continuity Plan to restore services to the greatest extent possible. This will ensure that our clients can continue their essential business operations, facilitated by our multi-location setup.
